FRIGHTENING TRUTHS ABOUT RECYCLING

PLASTIC BAGS:

Plastic bags are 100% recyclable at local grocery stores... If You Dare...

Keep out -Never put plastic bags in your recycling bin. Plastic bags can get tangled in the sorting equipment and contaminate loads at the recycling center.

Reuse plastic bags for trash can liners, making creepy crafts, or picking up gruesome pet waste.

Every minute 1 million plastic bags are used, less then 1% are recycled--EEK!

Frightfully, 10% of the plastic bags made every year will end up in the ocean.
